

PARENTS - TEACHER MEET 2020-21.

The Parents - teachers meet is usually conducted for the improvement of the Academic Performance of the students and for gaining the co-operation from the parents. In such meetings, the over-all performance of the students are discussed and follow-up steps are taken to overcome the identified problems. However, in this academic session i.e. 2020-21 - the parents - teacher meet could not be conducted ~~was~~ off. But the institution has tried to maintain communication with the parents via whatsapp group (each batch has a separate group of parents including the teachers of that particular batch, the hostel wardens & the principal). Through this group virtual meeting / information sharing is conducted on the student's performances; extra care for slow-learners is also given importance by giving special counselling through telephonic conversation requesting parents to encourage and motivate their children to study harder & improve their overall academic performance amidst the covid-19 pandemic.
